

Total Seal Piston Rings

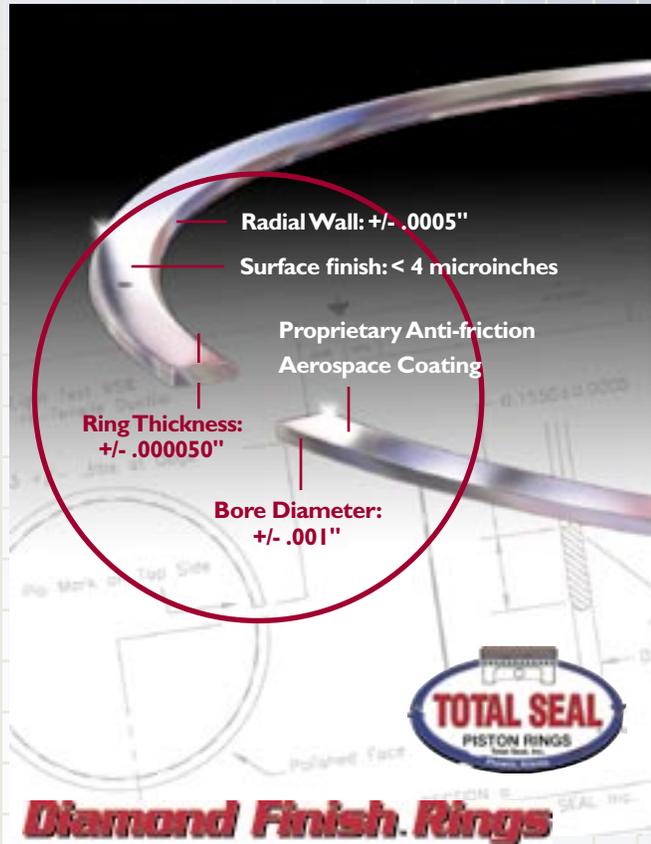

The Ultimate Piston Ring

When only the best will do...PPPC now offers Total Seal® Diamond Finish™ Piston Rings. These rings are intended for hard core racing and are currently used in the highest levels of STOCK CAR, DRAG and OPEN WHEEL COMPETITION.

Total Seal is driven to manufacture the most technologically advanced and highest quality piston rings available. Benefits are: tolerances of +/- .000050", improved sealing between piston and piston ring, optional PVD coatings that are engineered to match cylinder material and minimize friction losses.

Diamond Finish top and 2nd rings are now available in most popular bore and ring groove sizes (i.e. 1/16", 1.5mm, 1.2mm and .043").

Total Seal now offers .7mm & .8mm top rings and various 2nd and oil ring combinations tailored to your specifications.
