

C-350 Wrist Pins Nextel™ Cup Series

C-350 provides higher compression strength & increased stiffness.

PPPC Wrist pins

Casidiam® Coated Super-finished Steel & Titanium

PPPC wrist pins are leading the industry in quality, technical specifications and availability. Choose from a variety of alloys best suited to your needs: 9310 Steel, C-350 Steel, H-13 Steel or Titanium.

All of our Wrist Pins are available with the very best DLC (diamond-like hard carbon coating). Casidiam is a hard, slippery thin film used for reducing friction and increasing part durability in metal-to-metal contact. Casidiam can eliminate galling problems and pin bore wear. Many engine builders are now successfully running steel-on-steel (floating pin) because of DLC coatings.

DLC's typically add .0002" to .0003" to the outside pin diameter.
